

wiwa

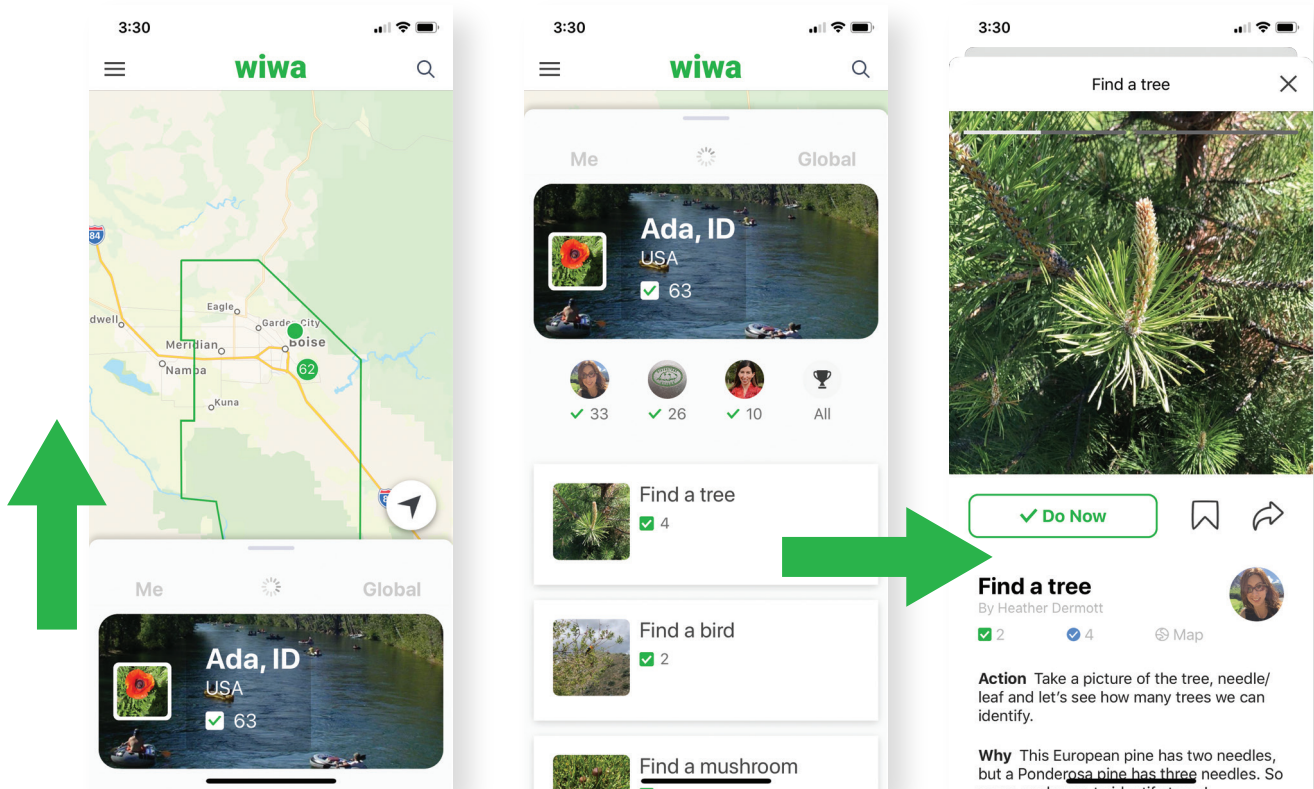

Getting Started

What is it?

Wiwa is a collective action platform that organizes simple actions to combat climate change and helps communities take action together.

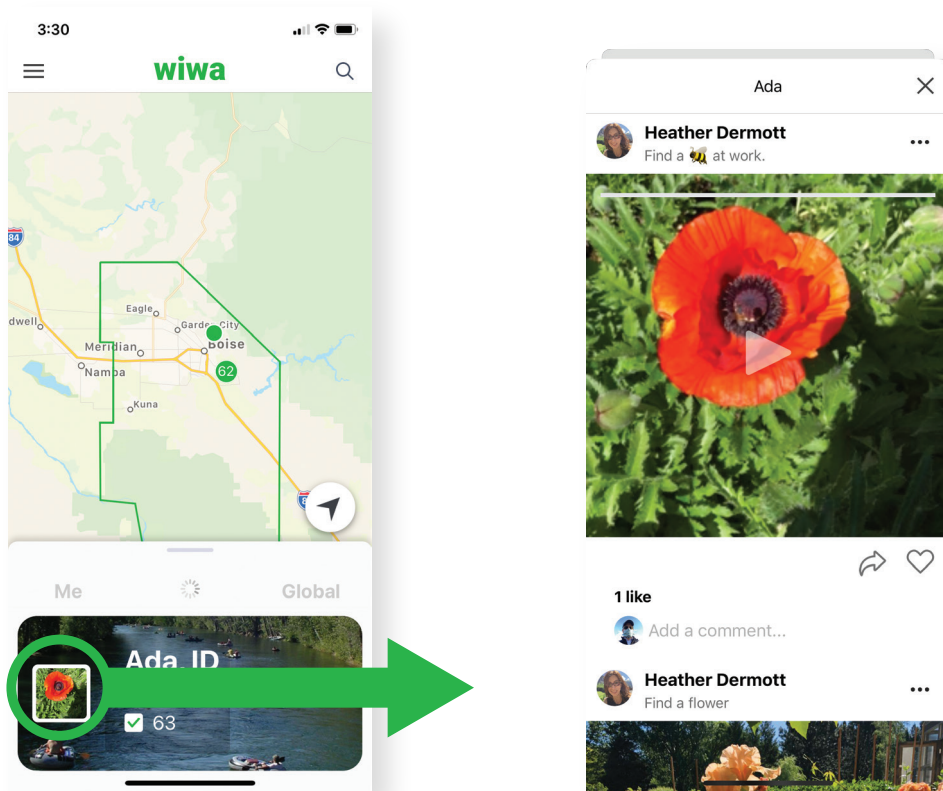

Take Action

When you join Wiwa will show you the actions being taken in your community right now. Find one you like and take it. Each only takes 5 minutes.

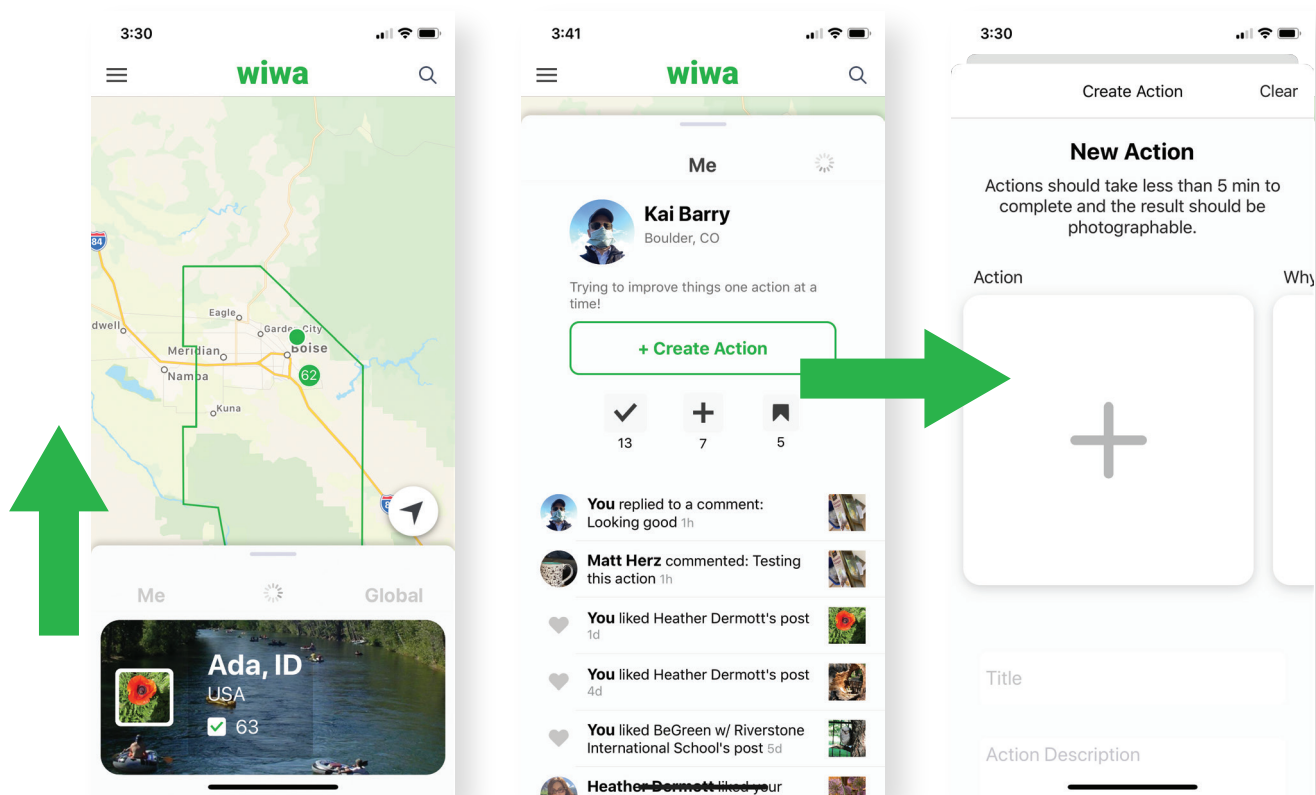

See Results

Every completed action is stamped on the map for everyone to see. Explore the map or explore the photo stream to see what's going on in any region.

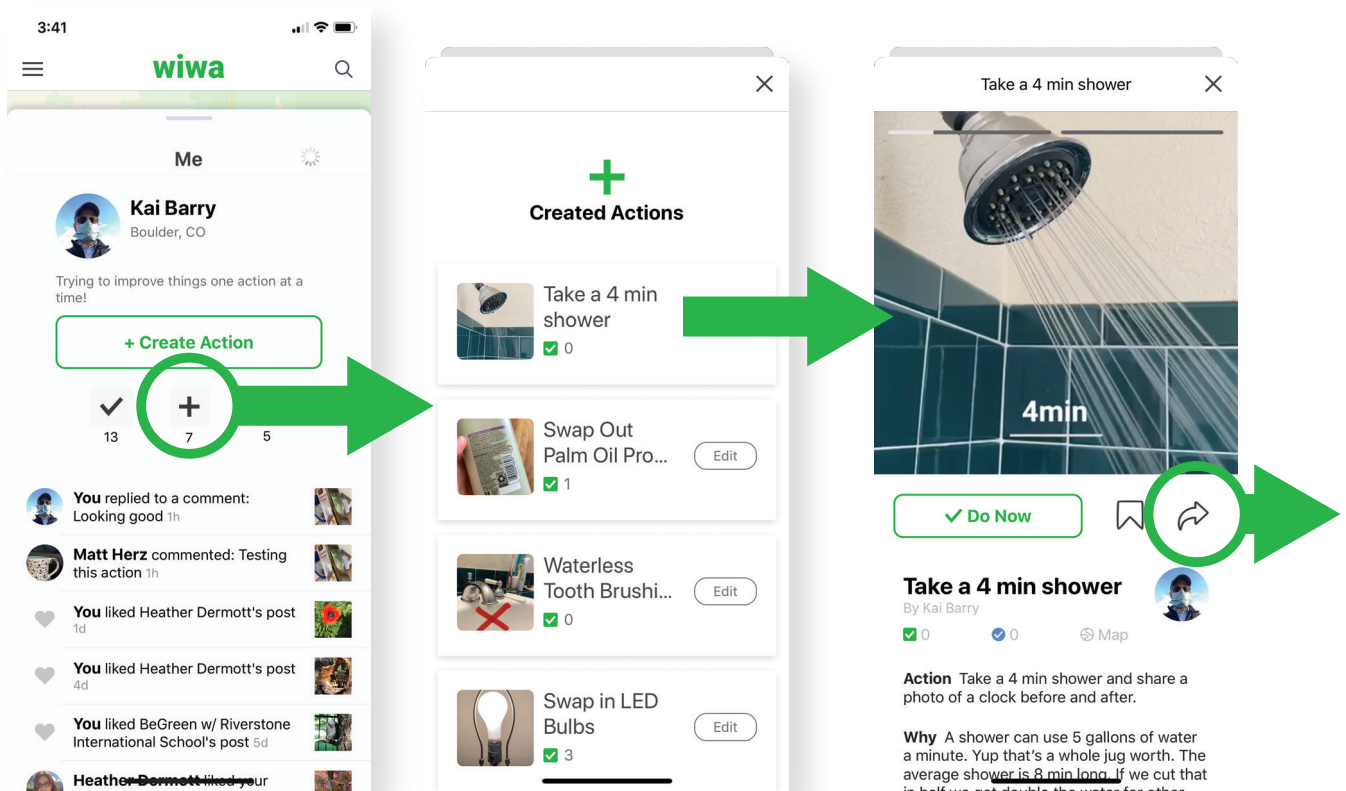

Create Action

Anyone can create a simple action for their community. Actions should take five minutes or less to complete and the result should be photographable.

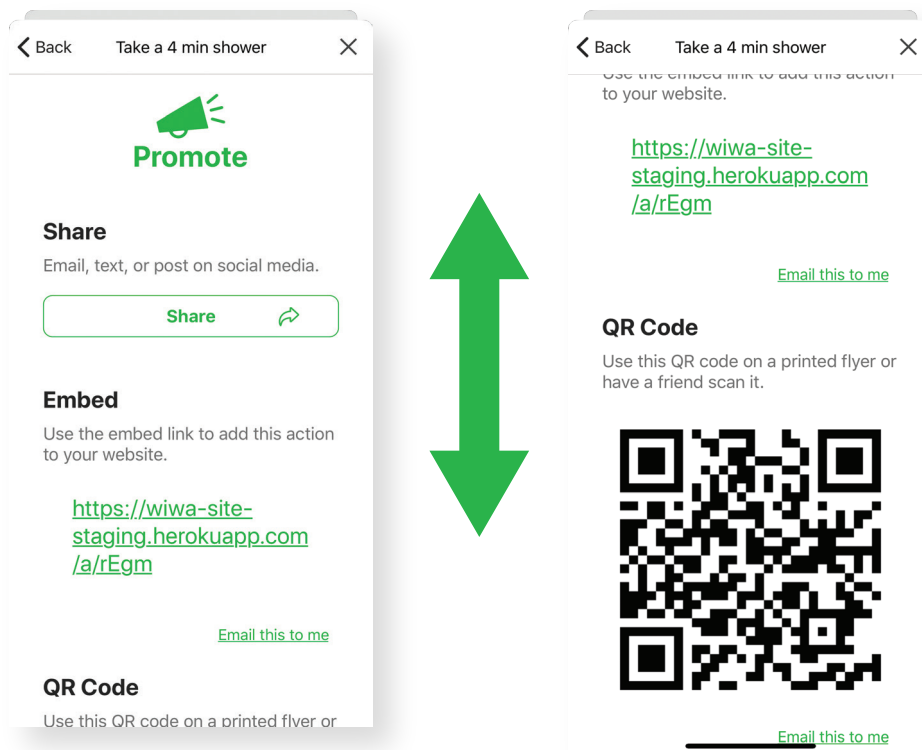

Promote Action

Any action can be shared on social media, embedded in your website, or exchanged by scanning a QR code. As people take action your results will be updated.

Promote Action (cont)

Create Collection

Collections makes actions easy to find and let others see what matters most to you. They can be perfect for organizations that want to promote multiple actions. Every list can be promoted just like individual actions.
